Who we are

The BMH Group is a private investment company with a diverse portfolio of resources, interests and equity; specialising in remote gaming and consultancy, angel investments, technology, and property management and development. Our aplomb comes from numerous successful projects of different sizes, scope and nature. We pride ourselves in having constructed and operated the first data centre in Malta back in 1999, BMIT, a company that was sold to Go plc in 2010. Under our management, BMIT reached and surpassed many targets and became a multi-million euro revenue company.

The BMH Group, a company having a diverse and unique background, was set up in 2011, following the sale of BMIT, to offer professional advice to organisations of any size within different industry sectors, using our expertise to help them improve their business performance.

The BMH Group aided in the creation of various remote gaming laws and by-laws and helped remote gaming operators resolve licensing and other regulatory issues within the Maltese Lotteries and gaming Authority. Furthermore, we have extensive experience in providing technical support and solutions for IT related queries and issues.

The Group's services are targeted at decision-makers and entrepreneurs who are driving the growth of their businesses based on the new economies of the 21st century who need services to guide and build their businesses safely into the future. With over 25 years combined experience in technology and gaming, our industry experience serves our customers well while allowing us to work more effectively with them.

We go beyond the normal industry capacities to a more trusting relationship with our clients; we conduct ourselves at a level higher than that exercised by industry norms to the extent that the overriding duty of our roles is to stimulate the obligation of exclusive loyalty.

Our passion for what we do transfers into what we deliver.

Remote Gaming

Malta was one of the pioneers amid the European Union Member States that regulated remote gaming and ever since the Maltese Government took this decision, Malta has emerged as a leader in the field and as a hub for remote gaming operators.

Engaging experienced service providers is crucial to the success of gaming operators. Through our extensive networking we can assist you to choose affiliates, intermediaries, networks and other strategic partners. We rely on integrity, leadership, in-depth knowledge and experience to help resolve your most important issues. Our presence and experience in the industry makes us your ideal partner.

What do we offer? A single source for all your wagering and gaming action!

- Highly customized Solutions
- White Label Solutions for both existing and newly established operators looking to enter the iGaming Industry
- Casino and Live Casino games offering
- Customised modular Sportsbook
- Odds Management Automation

Investment in Malta is what has made the BMH Group successful. Over the years we have helped entrepreneurs and new businesses setup their operation and put them on the path that led them to success. These experiences have given us considerable business acumen, which we are always ready to share with people embarking on new

ventures, giving our advice on how to be most successful. We have a forward-thinking approach and are always ready to invest in companies working on new and innovative notions, concepts and technologies.

The BMH Group in collaboration with its partners in MGT Holdings is a growing group of exceptional people who bring experience, vision and motivation. We have built our own companies, had prior investments and have wide networks of significant, international connections. You will be supported by a strong and talented team of experienced business angels and specialists who are dedicated to help you succeed. MGT Holdings is also the representative of Alpine Group, S.A. (www.alpinegroup.ky) across a number of countries.

Co-location and Managed Services

It's not about doing more with less anymore. It's about doing even more, with even less. We constantly hear from our customers that their IT departments are under intense pressure to deliver more services, in faster timeframes, with smaller budgets and leaner staff. Most face the challenge of data centre transformation, which is changing the way they think about their business. A driving force in the transformation is the need to get out from under the burden of an aging infrastructure, which is causing many companies to look at alternatives to traditional on-premises data centre approaches.

Whether it's a single rack of dedicated servers or a whole floor of data centre space the BMH Group, in collaboration with Unicept Data Ltd., can tailor a solution that's right for you, and that scales with your business as you grow.

Unrivalled technical expertise and outstanding customer support allow the BMH Group to ease clients through all pivotal phases of their IT initiatives - system planning, application development, implementation, infrastructure management and hosting.

Our dedicated team of highly trained and experienced staff will give you an exceptional, single-source solution to any of your facility or data centre management requirements.

Property Management

We understand how time-consuming, costly and stressful it can be to look for and look after your ideal property. We know because we manage our own buildings and guests. At the BMH Group our aim is to make the process of occupying, leasing, and maintaining a property in Malta as smooth, straightforward, enjoyable and transparent as possible.

We provide a single point of contact to help you make your home or office a comfortable, clean and efficient place to live or work. From property management through running operational processes, what we provide is based on long established field standards and thorough knowledge of various industry sectors.

The BMH Group - Small enough to listen; Big enough to deliver!
